FARM_MANAGER

Farm Manager — Operational Scope & Workflow

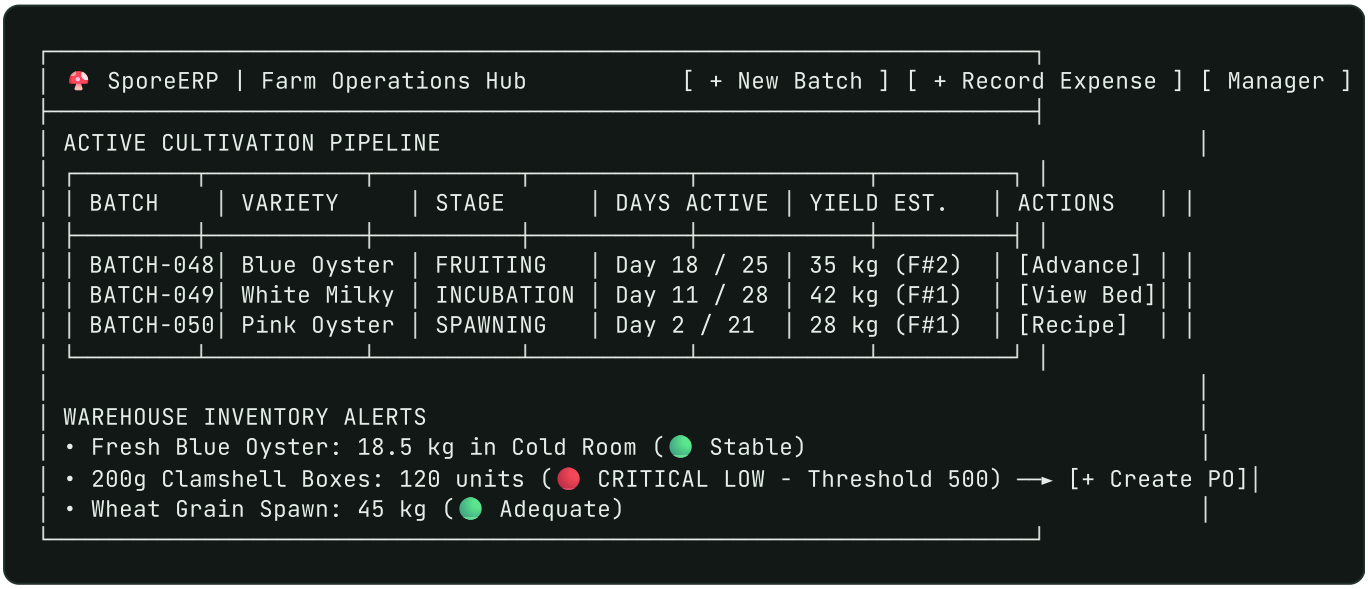

Complete Farm Operations: Cultivation, Inventory, Orders, Purchasing & Expenses

PRIMARY SCOPE	ACCESS BOUNDARY	KEY ROUTES
Facility Operations & Daily Execution	All Operations (Restricted from Founder P&L/Settings)	/admin/production, /admin/inventory, /admin/orders

1. Operational Flowchart & Daily Routine

1. **Morning Farm Inspection & Production Status**
   Inspects growing room batches, checks bed colonization rates, approves stage advancements.
2. **Harvest & Inventory Reconciliation**
   Verifies daily harvest yields (Grade A / B) injected into cold room; reviews stock alerts.
3. **Procurement & Supplier PO Approval**
   Creates and settles raw material purchases (paddy straw, grain spawn, punnets) in /admin/purchases.
4. **Customer Order Oversight & Exceptions**
   Monitors dispatch queue; handles cancellations, refunds, and delivery issues.

2. Farm Operations Command Hub Wireframe

3. Granted vs Restricted Permissions

Module	Permission Code	Status	Scope
Production	production:* & harvest:*	FULL GRANTED	Create batches, advance stages, supervise harvest yields
Inventory	inventory:* & purchases:*	FULL GRANTED	Adjust stock, approve spoilage write-offs, create supplier POs
Orders	orders:view_all & cancel_refund	FULL GRANTED	Inspect all customer orders, issue cancellations & refunds
Finance	finance:pnl:view	RESTRICTED	Founder only (Protected against operational staff)
