Production Staff — Farm Floor & Cultivation Flow

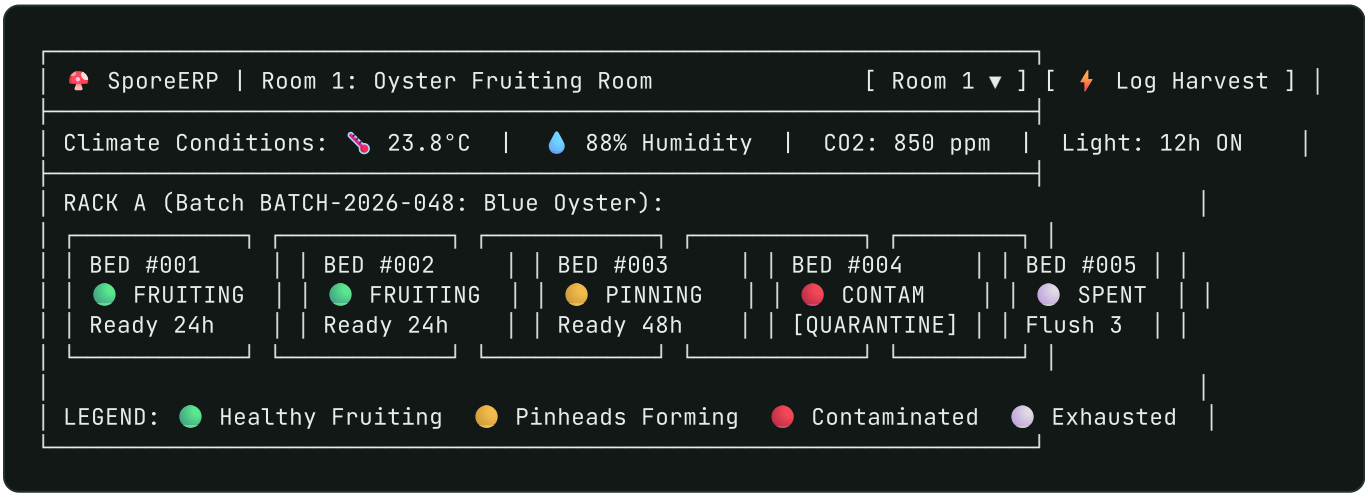

Beds Management, Room Climate Monitoring, and Fast Harvest Weighing

PRIMARY SCOPE	SECURITY BOUNDARY	KEY ROUTES
Growing Rooms & Cultivation Floor	Farm Floor Only (No Customer/Finance Data)	/admin/production/rooms, /admin/production/harvests

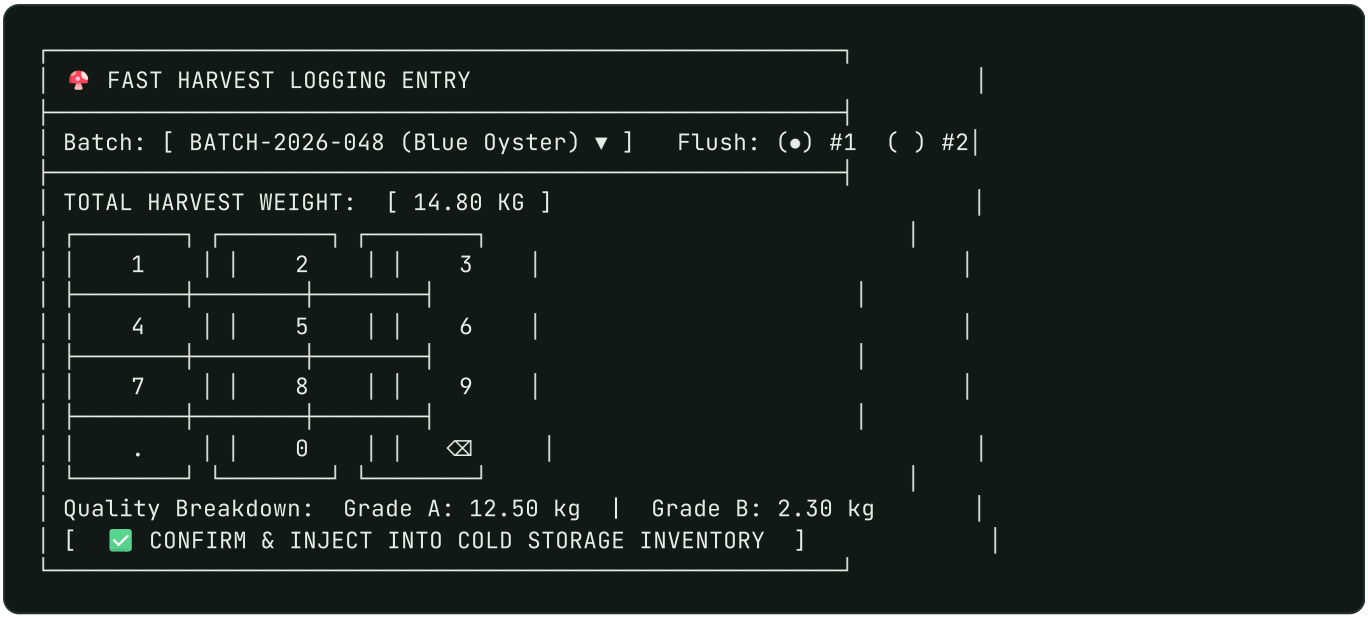

1. Agronomy Lifecycle Flowchart

1. **Substrate Sterilization & Inoculation (Spawning)**
   Boils/steams paddy straw (65% moisture), mixes grain spawn, hangs cylindrical beds.
2. **Daily Incubation & Contamination Checks**
   Inspects bed colonization in dark room. Immediately flags green mold/ink-cap for quarantine.
3. **Fruiting Room Climate Maintenance**
   Boosts relative humidity to 85–90%, provides fresh air exchange and indirect lighting.
4. **Daily Harvest Logging & Auto-Injection**
   Weighs harvested flushes with giant glove-friendly numpad; allocates Grade A/B weights.
